

Measuring for A Cane

It's a simple concept but:

o Let's review the basics!

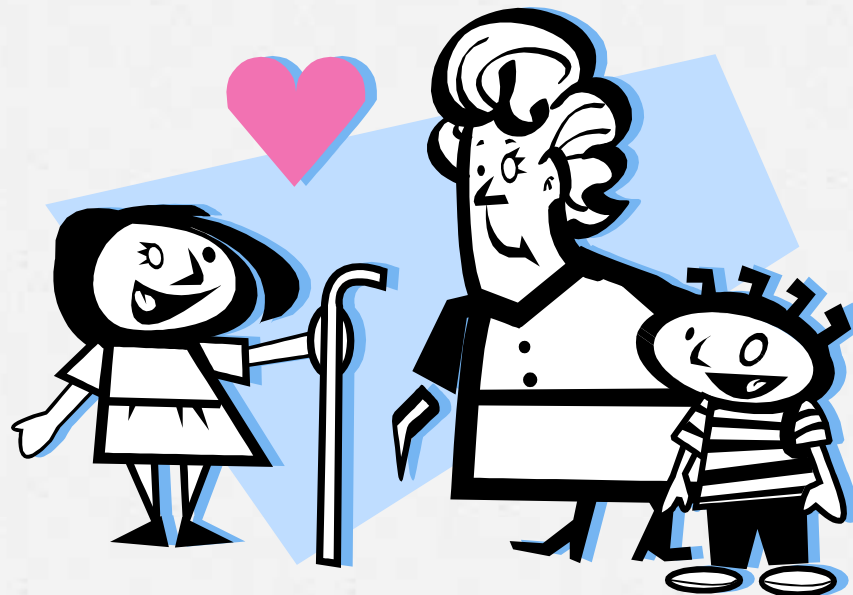

Objectives:

- o At the conclusion of this activity, participants will be able to:
 - o Describe the bony landmarks that should be used to correctly measure the height of a single point cane for a patient.
 - o Describe alternatives to the use of bony landmarks that can be used....

We've all seen it done
incorrectly!

Demonstrate Something

Provide Time to:

- o Practice:
- o Answer questions
- o Complete your surveys
