

Vital Signs

What you need to know and why!

What you need to know about Vital Signs

Objectives:

- At the end of this presentation, participants will be able to:
 - State the rationale behind why taking and recording vital signs is important prior to initiating treatment interventions with patients
 - Differentiate between common misconceptions that are held by the public regarding normal vital signs and why they are misconceptions
 - Etc.

Plan for presentation:

- Who will be doing what?

The Demonstration

Provide the rationale if:

- You expect to see a change in behavior!

Provide time for:

- Practice
- Answering questions
- Participants to complete your surveys
